- Consider your composition: Where do you want to place your name (center, bottom, top, on a diagonal)? This will be your focal point. Make it large and clear.
- Consider visual impact: How will the text and images work together to create a final product? Remember that the lettering should not be separate from the images but combined in a creative way.
- Consider what media (art material) will you use on the final project? But you can use pencil for now.
