

**“The Solar System” sung to the tune of “She’ll be Coming ‘Round the Mountain”**  
**By Mrs. Libby’s Class 2017**

Well, the light starts at the sun when it shines  
(So bright!)  
Light starts at the sun when it shines  
(So bright!)  
Light starts at the sun and it shines on everyone  
Light starts at the sun when it shines  
(So bright!)

Mercury’s the fastest one of all  
(Zip, zip!)  
Mercury’s the fastest one of all  
(Zip, zip!)  
Mercury’s so fast it just goes flying past  
Mercury’s the fastest one of all  
(Zip, zip! So bright!)

Venus is a planet not a star  
(Zat true?)  
It’s the color of a peanut butter jar  
(Zat true?)  
It’s called the morning star which is really quite bizarre  
Venus is a planet not a star  
(Zat true? Zip, zip! So bright!)

Earth’s the only planet that is wet  
(Splash, splash!)  
It’s the only planet with life that we’ve found yet  
(Splash, splash!)  
Well, I hope you won’t forget, home for everyone you’ve met  
Earth’s the only planet that is wet  
(Splash, splash! Zat true? Zip, zip! So bright!)

Mars is the closest one to us  
(Howdy Neighbor!)  
It’s the color of the sauce on pizza crust  
(Howdy Neighbor!)  
Well, it’s full of blowing dust, made of iron turned to rust  
Mars is the closest one to use  
(Howdy Neighbor! Splash, splash!, Zat true? Zip, zip! So bright!)

Jupiter has got a big red eye  
(So big!)  
It's a hurricane blowing round the sky  
(So big!)  
We'll It's got a big red eye, you could fit three Earth's inside  
Jupiter has got a big red eye  
(So big! Howdy Neighbor! Splash, splash! Zat true? Zip, zip! So bright!)

Saturn's got some big rings made of ice  
(Ring, ring!)  
If we were close enough to skate it would be nice  
(Ring, ring!)  
The rings are big and bright, all the other ones are white  
Saturn's got some big rings made of ice  
(Ring, ring! So big! Howdy Neighbor! Splash, splash! Zat true? Zip, zip! So bright!)

Uranus is the planet on its side  
(Tilt, tilt!)  
Its rings go up and down, let's take a ride  
(Tilt, tilt!)  
Not the biggest or the brightest or the heaviest or lightest  
But Uranus is the planet on its side  
(Tilt, tilt! Ring, ring! So big! Howdy Neighbor! Splash, splash! Zat true? Zip, zip! So bright!)

The last one of the planets is Neptune  
(Bye, bye!)  
It is bluish white and has a lot of moons  
(Bye, bye!)  
In Greek he's called Poseidon, he's the god that has a trident  
The last one of the planets is Neptune  
(Bye, bye! Tilt tilt! Ring, ring! So big! Howdy Neighbor! Splash, splash! Zat true? Zip, zip! So bright!)
