

How to Connect to Your Home Internet

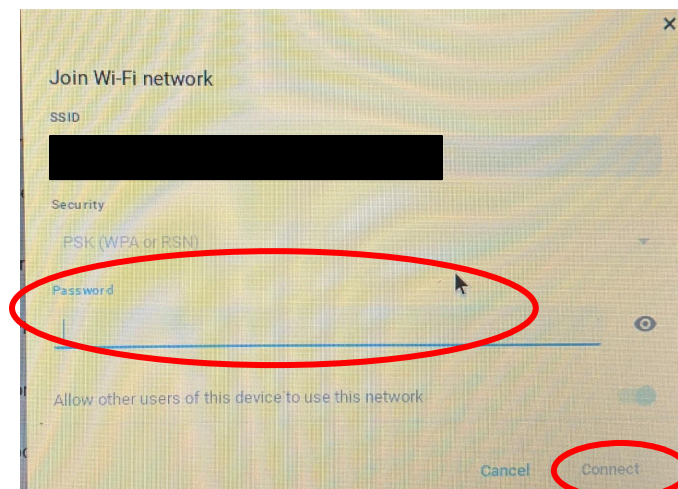

1. Turn on the Chromebook using the power button, or by opening the lid.

2. As it loads, it will try to connect to the internet. You should get a Network not available screen. **Click on your Internet.**

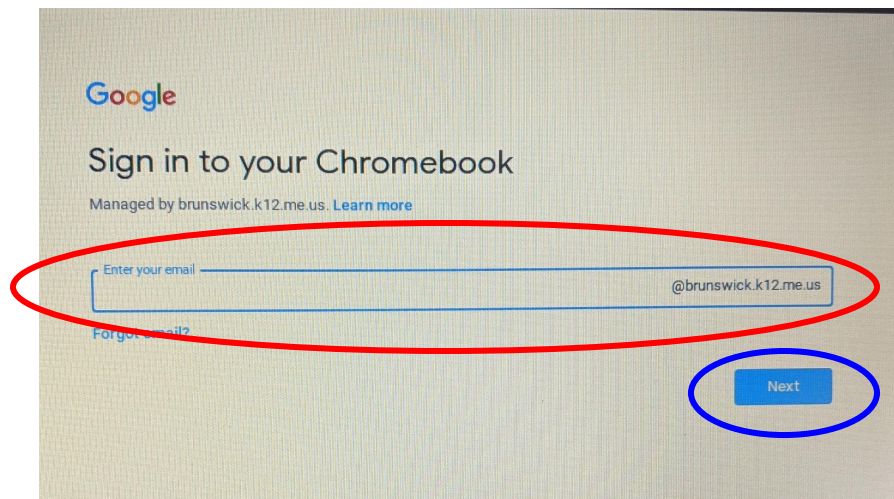

3. If you have a password on your internet, a box to put in the password will appear. Type it in and then click connect.

How to Log Into Your Chromebook

1. When your Chromebook is connected to the internet, when you turn it on you will see a sign in screen.
2. In the box, **type your username** (this is the one that starts with the graduation year, last name, first initial). Then click **Next**.

3. On the next screen, it should say Hi (Your Name) with your email underneath. Put your **password** in the box. Then click **Next**.
