# Place Value Choice Board

## Roll a Number

Use a dice to roll a number. Roll three times and write down each digit. Then, use base ten blocks to make your number.

After you make your number, draw your blocks and write the number on a poster.

## Which is more?

Lakeland Elementary has 910 students. Maple Hills Elementary has 899 students. Which school has more? Draw a picture of each school and use  $<$ ,  $>$ , or  $=$  to compare them.

## Turtle Tales

Write a story about a turtle (or another animal) that has to compare 2 three digit numbers. In the story, explain how he compares them. The story should have a beginning, middle, and end.

## Number Riddle

Find a number for the riddle.

I am a three digit number. The digit in the hundreds place is less than 5.

The digit in the tens place is less than the digit in the ones place.

The digit in the ones place is 7.

## Expanded Form

Lilly wrote down the expanded form for the number 109. She wrote  $100 + 90$ . Is Lilly correct?

Write a letter to Lilly explaining why she is or is not correct. Give examples.

## Comic Strip

Make a comic strip to show the number 1,189 written as a sum of \_ thousands, \_ hundreds, \_ tens, and \_ ones. Make sure the comic strip could teach a friend.

## Compare and Order

A restaurant is trying to figure out what their most popular dish is. Put the dishes in order from least ordered to greatest ordered.

Chicken Alfredo - 324 orders  
Spaghetti - 481 orders  
Macaroni -n- Cheese - 409 orders  
Chicken Nuggets - 342 orders  
Pizza - 490 orders

## Be the Teacher

Create a video or script showing the difference between standard form, word form, and expanded form. Use base ten blocks to help you.

$$\begin{array}{r} 8 - 2 \\ + 14 = 6 \\ 70953 \end{array}$$

## Create a Poster

What is the difference between the thousands place, hundreds place, tens place, and ones place. Make a poster that teaches about the different place values, where they are, and what they mean.

## Multiple-Step Word Problems

- a. Madison is reading a book that has 232 pages in it. She read 42 pages over the weekend. Then she read 30 more pages on Monday night. How many pages does Madison have left to read?

\_\_\_\_\_

- b. Steven bought two boxes of erasers. One box had 24 erasers in it. The other box had 36 erasers in it. He then gave 18 of his erasers to his friend. How many erasers did Steven have left?

\_\_\_\_\_

- c. In football, a player scores 6 points for a touchdown and 3 points for a field goal. Sujith's team scored 2 touchdowns in this week's game. Last week they scored 1 touchdown and 1 field goal. How many points did Sujith's team score in both games combined?

\_\_\_\_\_

- d. Mia bought a sketch book with 125 blank pages in it. She tears out 7 blank pages for her friend to draw on. Mia draws pictures on 64 pages. How many blank pages does she have left?

# Sheep Bump

Subtraction – Roll 1 and Subtract from 9

$$9 - \_ = \_$$

7 7	6 6	4 4	5 5
8 8	3 3		
6 6	5 5	4 4	

a game for 2 players

**Need:** 1 dice and 8 counters per player – each player uses a different color

**To Play:** Players take turns to roll the dice and take the number on the dice away from 9. Then they cover this number with one of their counters, covering the large number. If another player has covered that number, they can 'bump' that counter off and put one of their own counters on it. If that number is covered by one of the player's own counters, they can add another counter on top and then they have won that space. You can only 'bump' when there is only one counter on the number. The winner of the game is the first player to use all 8 of their counters.

# Take From 13 Bump

Subtraction - Roll 2 and Subtract from 13

$$13 - \_ = \_$$

a game for 2 players

**Need:** 2 dice and 8 counters per player – each player uses a different color

**To Play:** Players take turns to roll the 2 dice, add the numbers together and then subtract the total from 13. Then they cover this number with one of their counters, covering the large number. If another player has covered that number, they can 'bump' that counter off and put one of their own counters on it. If that number is covered by one of the player's own counters, they can add another counter on top and then they have won that space. You can only 'bump' when there is only one counter on the number. The winner of the game is the first player to use all 8 of their counters.
