

with water. Wait 5-10 minutes while the

pellets soak up the water.

2. Dump extra water in the sink. Place one pellet in each pot.
3. Place one seed in each pellet. Push the seed down gently, so that it is in the pellet.
4. Put your pots on a plate or tray. Find a sunny spot in your house to put your plants.
5. Check your plants each day. If the soil is dry, give it some water.
6. As your plants grow, draw your

 <p>summer squash seeds</p>	<p>Summer squash is a healthy yellow fruit. Try to keep your plants growing all summer so that you can observe them using taste, too!</p>
 <p>peat pellets</p>	<p>Peat pellets will give your seeds a place to grow. When you add water, they will expand.</p>
 <p>peat pots</p>	<p>Place your pellets in the pots after adding water.</p>

Thank you!

This planting opportunity is made possible through a BCEF grant. The first grade and multi-age teachers are very grateful to BCEF for providing planting kits for all of our first and multi-age

students. We hope you enjoy this special project with your family!
