## The Engineering Process

What is the problem?

Brainstorm possible solutions.

Redesign the solution to make it better.

Be creative with materials to solve the problem.

Make a detailed plan.

The diagram illustrates the engineering process as a continuous cycle. It features a central title 'The Engineering Process' with a large arrow pointing from the 'What is the problem?' step to the 'Brainstorm possible solutions.' step. The cycle continues through 'Be creative with materials to solve the problem.', 'Make a detailed plan.', and 'Redesign the solution to make it better.', which then loops back to 'What is the problem?'. Each step is accompanied by a box for notes and a set of horizontal lines for writing. The 'Make a detailed plan.' step is located at the bottom right of the page, while the other steps are arranged in a loop on the left and top.
