

2025-2026 AP Statistics Assignments

(see web site for reading guides, glossaries of important terms, notes, HW answers, and other goodies)

Notes: When you read, you are required to complete comprehensive, ledgable notes using any method you want for 3 HW grades.
See my website for guided notes template if you want to type them

Chapter	Day	Assignments	Objectives	Homework	Reading	4B	3O
2	0 (post test)	2.1 Introduction, Measuring Position: Percentiles, Cumulative Relative Frequency Graphs, Measuring Position: z-scores	- Use percentiles to locate individual values within distributions of data. - Interpret a cumulative relative frequency graph. - Find the standardized value (z-score) of an observation. - Interpret z-scores in context.	1, 5, 7, 9a-b	Section 2.1 - pgs 83-91	15-Sep	16-Sep
2	1	2.1 Describing Location and Cum. Freq. Plots <i>Activity - 2.1A Explore Cum. Freq. Plot</i> <i>Activity 2.1B - Intro to Z-Scores and Normal Distribution</i>	- Describe the effect of adding, subtracting, multiplying by, or dividing by a constant on the shape, center, and spread of a distribution of data. - Approximately locate the median (equal-areas point) and the mean (balance point) on a density curve.	11, 13 and finish activities <i>Starts Frappy's (read 1st 2 pages)</i>	Finish Section 2.1	17-Sep	18-Sep
2	2	2.1 Transforming Data, Density Curves <i>Activity - 2.1C WolfSTAT Company</i> <i>Activity - Review Frappy's and do 2005bQ1 in class</i>	- Describe the effect of adding, subtracting, multiplying by, or dividing by a constant on the shape, center, and spread of a distribution of data. - Approximately locate the median (equal-areas point) and the mean (balance point) on a density curve.	19, 21, 23, 31, (optional MC33-38) and finish activities	Section 2.2 - pgs 110-119	19-Sep	22-Sep
2	3	2.2 Normal Distributions, The 68-95-99.7 Rule <i>Activity - 2.2A The Empirical Rule (68-95-99.7)</i> <i>Activity - 2.2 DESMOS - SM2.2 - Back to the Normal Curve</i>	Use the 68-95-99.7 rule to estimate the percent of observations from a Normal distribution that fall in an interval involving points one, two, or three standard deviations on either side of the mean.	Complete Activities	Finish Section 2.2	23-Sep	24-Sep
2	4	2.2 (cont) Normal Distributions, The Standard Normal Distribution <i>Activity - 2.2B Finding area under a Normal Distributions</i>	- Use the standard Normal distribution to calculate the proportion of values in a specified interval. - Use the standard Normal distribution to determine a z-score from a percentile. - Using Table A (calc commands: normalcdf and invnorm)	41, 43, 45, (47& 49 Sketch & Use calc!!), 51 and finish activities		25-Sep	26-Sep
2	5	2.2 Normal Distribution Calculations and Assessing Normality <i>Activity - 2.2C Solving Problems with the Normal Distributions</i> <i>Review Frappy's and do _____ in class</i> <i>2.2 NOT COVERED-->Normal Probability Plots on the Calculator</i>	- Use TI84 to find the percentile of a value from any Normal distribution and the value that corresponds to a given percentile. - Make an appropriate graph to determine if a distribution is bell-shaped. - Use the 68-95-99.7 rule to assess Normality of a data set. Interpret a Normal probability plot (not on AP exam)	53, 54, 55, 63, (optional MC69-7) and finish activities		29-Sep	30-Sep
2	6	<u>Chapter 2 Review</u> <i>Activity - Chapter 2 Review</i> <i>Activity - Frappy's (complete 2 in-class)</i>	<i>Introduction to FRAPPY's -</i> <i>CHAP1: 2005q1 & 2010Bq1</i> <i>CHAP2: 2006Bq1 & 2008q1</i>	Complete Chapter 1&2 Frappy's (For each: 12min, score, correct) PLUS TPS CH. 2 AP Practice Test		Oct1 (½Day)	2-Oct
2	7	Chapter 2 Test	Chapter notes collected	1, 3, 9, 10	Section 3.1	3-Oct	6-Oct
