

CURRICULUM DEVELOPMENT AND ADOPTION

It is the intent of the Brunswick School Board to adopt written curriculum to serve as the framework for successful teaching and learning in the Brunswick schools.

The curriculum of the Brunswick School Department is developed and meant to be interpreted in terms of federal and state statutes, rules of the State Board of Education and Department of Education, and other regulatory agencies within the local, county, state, and federal government.

Changes in needs, conditions, purposes and objectives will require revisions, deletions and additions to the curriculum of the Brunswick School Department. The Brunswick School Board will follow an approved curriculum adoption process.

The review of draft curriculum shall be the responsibility of the Brunswick School Board Curriculum Committee. Final action on proposed curriculum shall be taken by the Board.
