

ASSIGNING STUDENTS TO SCHOOLS

The assignment of students to Brunswick elementary schools will be made by the Superintendent or his designee based upon the location of the student's home as it relates to the most current School Board approved districting plan. The Superintendent or his/her designee may, at his discretion, authorize a transfer to another school in the district based upon class size, required special education and related services, or if he deems it to be in the best interest of the student.
